For professional users

VoIP network-based phones that use LTE technology are a new product of the ARG-telecom company. This phone can be used with LTE technology in second generation GSM cellular networks, third Generation (3G/WCDMA) or fourth Generation (4G/LTE). Also, it is very useful for areas that do not have a PSTN or telephone and can be an effective option. One of the important features of this phone is the ability to provide wireless internet service to other devices, as it also has a wireless router design. Also this device has other features include applications such as calendars, calculators and FM radio. Moreover, You can manage and configure phone settings by help of the user panel (web browser of computer) and apply the desired settings via wireless network or USB cable.

مخصوص کاربران حرفه ای

تلفن‌های مبتنی بر شبکه VoIP که از فناوری LTE استفاده می‌نمایند محصول جدید شرکت ارگ جدید است. این تلفن‌ها با استفاده از فناوری LTE قابلیت کاربری در شبکه‌های مخابرات سلولی نسل دوم، سوم (3G/WCDMA) یا نسل چهارم 4G/LTE را دارد. این تلفن برای مناطقی که فاقد شبکه تلفن شهری یا PSTN است، کاربرد بالایی داشته و می‌تواند گزینه ای کارا به شمار آید. یکی از قابلیت‌های مهم این تلفن امکان ارائه سرویس اینترنت بی‌سیم به سایر دستگاه‌ها است، چرا که این دستگاه درعمل مانند یک مودم LTE طراحی شده است. از امکانات دیگر این دستگاه برنامه‌های کاربردی نظیر تقویم، ماشین حساب و رادیو FM است. همچنین از طریق اتصال با کابل USB یا شبکه بی‌سیم می‌توانید با کمک مرورگر اینترنت وارد پنل کاربری شده و تنظیمات این تلفن را مدیریت نمایید.
